EXPERIENCE

BrainSpark Ideas Pvt. Ltd.

Software Developer Intern   Oct 2023 - Mar 2024

- Collaborated with senior developers to implement new features across Viso.Events' web and mobile applications, enhancing user experience and performance.
- Debugged and maintained legacy code by identifying issues in APIs and backend logic, ensuring smooth and stable functionality.
- Wrote, tested, and optimized code using PHP, MySQL, Laravel, and JavaScript for feature development and system fixes.
- Participated in code reviews, documentation updates, and QA processes to uphold code quality and best practices.
- Worked closely with the CEO, senior developers, and the team to understand project requirements and ensure project success.

SKILLS

PHP, HTML5, CSS, JavaScript, MySQL, Bootstrap, Git/GitHub, Node.js, MongoDB, Java, REST APIs, Linux, Laravel

PERSONAL PROJECTS

StalkStock ↗

- Built a product tracking app using PHP, MySQL, and cURL to scrape prices from multiple e-commerce sites.
- Allows users to set alerts by pasting product URLs and setting target prices (optional), with automated email notifications.
- Supports platforms like Amazon, Meesho, Tata Cliq, Casio India, and HMT Watches.
- Added Google OAuth login and signup for secure and seamless user authentication.
- Includes user role-based access, secure password reset, CAPTCHA, and mobile responsiveness.
- Automated background scraping using Hostinger cron jobs ensures 24/7 monitoring.
- GitHub Repo

Cricket Scorecard Web App ↗

- Developed a full-stack web app (2500~ lines of backend code) using PHP, MySQL, and JavaScript.
- Features normal and super-admin logins, password recovery, match setup, and inning-wise tracking.
- Fully replicated IPL rules, including NRR (up to 3 decimal places), DLS handling, Super Overs, reduced-overs, and abandoned matches.
- Points table and outcomes 100% match IPL 2025 standings for all test cases.
- Maintained progressive improvements with 50+ Git commits, adhering to best coding practices.
- GitHub Repo

Mini Projects

- Text Utility Chrome Extension: A lightweight Chrome extension for real-time character count and CSS/JavaScript minification using JavaScript. [GitHub]
- Data Visualization Dashboard: An interactive dashboard using Chart.js to visualize and filter a dataset of 1000+ MongoDB documents across multiple chart types. [GitHub]
- Invoice Management System: A local inventory management tool with HTML, CSS, JavaScript, and localStorage, supporting add, update, delete, and sort functionalities. [GitHub]
- Bilingual Business Website: A static website for a small business, focused on performance, accessibility, and responsive design.

EDUCATION

Post Graduation Diploma in Advanced Computing

Centre for Development of Advanced Computing, Bengaluru   Sep 2022 - Mar 2023

Bachelor of Engineering

University of Mumbai   June 2018
